

ID Web Watch:

Spotlight on Summer

Point and click your way to more info selected by *INFECTIOUS DISEASES IN CHILDREN*.

www.nlm.nih.gov/medlineplus/insectbitesandstings.html 

This website features general information/overviews, treatment information and organizations focused on insect bites and stings.

www.medicinenet.com/Insect_Sting_Allergies/index.htm  

This website is produced by doctors, and provides information on insect sting allergies including terms, articles, diseases and conditions, medical procedures and tests, medications, health facts and doctor responses.

www.keepkidshealthy.com 

Keepkidshealthy.com looks to supplement the information that parents receive from their child's physician, with a special emphasis on better health through preventive care.

www.aad.org/public/Parentskids/kids.htm 

Kids' Connection is a special section of the American Academy of Dermatology's website that provides children aged 8 through adolescence with information about dermatology. Under this section, there is information on skin conditions, a questions section, links to other websites, Camp Discovery and more.

www.kidshealth.org/parent/misc/PSpecial.html 

KidsHealth Spotlight on Summer offers articles to parents, children and teenagers to help them prepare for summer. Articles cover topics such as dehydration, insect bites and stings, allergies and sun, water and bicycle safety.

allergies.about.com/cs/summer/  

This is a website full of articles that help explain summertime allergies. It offers tips, definitions, links, prevention and alternatives to fighting allergies.

www.aap.org/advocacy/releases/summertips.htm  

The AAP has issued summer safety tips for patients and professionals to follow.

www.kidsource.com 

KidSource OnLine is a group of parents who want to provide knowledge and advice to help parents better raise and educate their children.
